

LAB LOGS

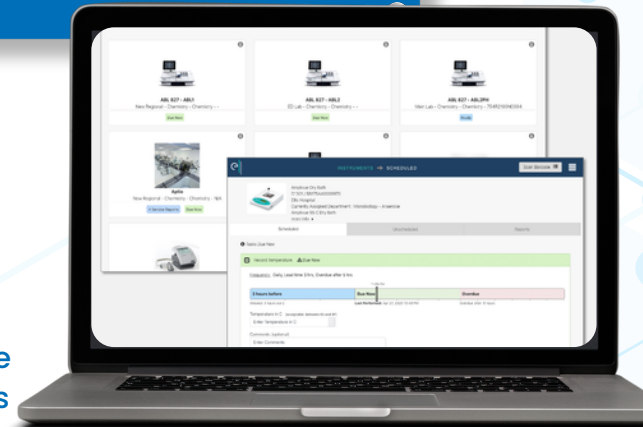

Centralize Laboratory Compliance Across Your Health System

Replace Paper Logs with Real-Time Digital Oversight

Hospital laboratories manage complex workflows, multiple departments, and strict compliance requirements — all while maintaining operational efficiency and minimizing downtime.

LabLogs helps hospital labs standardize compliance processes, automate recurring tasks, and gain real-time visibility across instruments, departments, and locations through a centralized digital platform.

Preventative Maintenance

Track recurring maintenance schedules to reduce downtime and improve reliability.

Instrument Downtime Tracking

Monitor service events, repairs, and operational status across all instruments.

Environmental Monitoring

Track temperature and environmental conditions to support compliance and testing accuracy.

Reporting & Dashboards

Generate real-time operational and compliance reports across locations and departments.

Why Hospitals Choose Lab Logs

- Eliminate paper logs and spreadsheets
- Standardize workflows across locations
- Track QC, maintenance, and downtime in one platform
- Improve audit readiness with digital records
- Monitor compliance activity in real time
- Reduce manual work with automated alerts
- Access records securely across teams and sites

Simplify Compliance Across Your Organization

LabLogs helps hospital laboratories modernize compliance management while improving operational visibility, accountability, and efficiency.

LAB LOGS

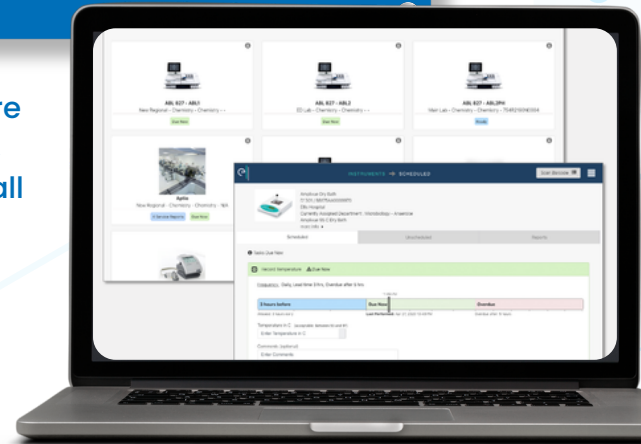

Modernize Laboratory Compliance & Workflow Management

Digital Compliance Tracking for Clinical Labs

Clinical laboratories face increasing pressure to maintain compliance, improve efficiency, and reduce manual administrative work — all while supporting fast turnaround times and reliable testing operations.

LabLogs helps clinical labs replace paper-based workflows with a centralized digital platform that simplifies compliance management and improves operational oversight.

Quality Control Tracking

Manage QC workflows with customizable forms and validation checks.

Preventative Maintenance

Schedule and monitor recurring maintenance activities.

Lots & Reagents Tracking

Maintain complete traceability from receipt through expiration.

Reporting & Dashboards

Generate dashboards and reports to monitor compliance and operational performance.

Why Clinical Labs Choose Lab Logs

- Replace paper logs with digital records
- Track QC, maintenance, and compliance in one platform
- Improve audit readiness with searchable documentation
- Reduce missed tasks with automated alerts
- Monitor operations in real time
- Standardize workflows across locations
- Improve efficiency and reduce administrative work

Replace Manual Processes with Digital Oversight

LabLogs helps clinical laboratories streamline compliance, improve visibility, and modernize daily operations.

LAB LOGS

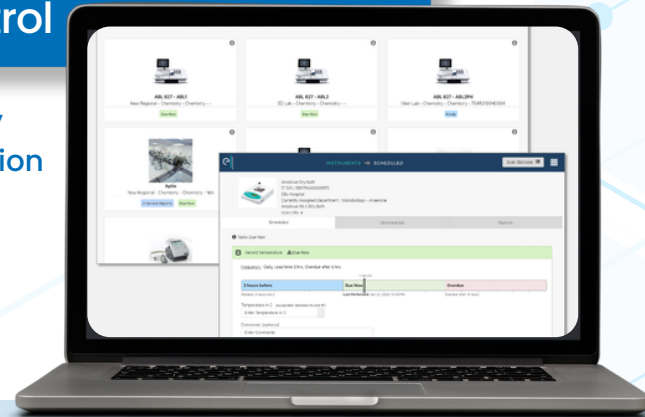

Digital Compliance Management for Regulated Laboratory Operations

Improve Traceability, Documentation,
& Operational Control

Life sciences organizations operate in highly regulated environments where documentation accuracy, traceability, and visibility into compliance are critical.

LabLogs helps laboratories modernize compliance workflows with centralized digital tracking, audit-ready records, and real-time operational oversight.

Electronic Documentation

Digitize compliance records, logs, and operational workflows.

Audit Trails & Reporting

Maintain searchable records with detailed activity tracking and reporting.

Preventative Maintenance Tracking

Manage recurring maintenance schedules and equipment service history.

Lots & Reagents Tracking

Track inventory and traceability from receipt through expiration.

Preventative Maintenance Tracking

Manage recurring maintenance schedules and equipment service history.

Lots & Reagents Tracking

Track inventory and traceability from receipt through expiration.

Why Life Sciences Organizations Choose LabLogs

- Replace paper documentation with digital records
- Improve traceability for instruments and reagents
- Support audit readiness with electronic records
- Reduce compliance gaps with automated alerts
- Standardize workflows across facilities
- Improve visibility into QC and maintenance activity
- Maintain secure, searchable records

LAB LOGS

Replace Paper Logs with Real-Time Compliance

Modernize Laboratory Compliance, Documentation, & Workflow Management

LabLogs helps laboratories, hospitals, and clinics replace paper-based compliance workflows with a centralized digital platform for real-time visibility, tracking, and audit-ready reporting.

Electronic Lab Logs

Replace paper binders and spreadsheets with secure, searchable digital records.

Quality Control & Compliance Tracking

Monitor QC activities, compliance tasks, and workflow status in real time across all locations.

Automated Alerts & Recurring Tasks

Reduce missed tasks with automated reminders, notifications, and recurring workflow scheduling.

Audit-Ready Reporting

Generate organized reports instantly to simplify CAP, CLIA, and Joint Commission readiness.

Environmental Monitoring

Track temperature, humidity, and environmental conditions to support testing accuracy and compliance.

Lots & Reagents Tracking

Maintain traceability and documentation for reagents, supplies, and expiration management.

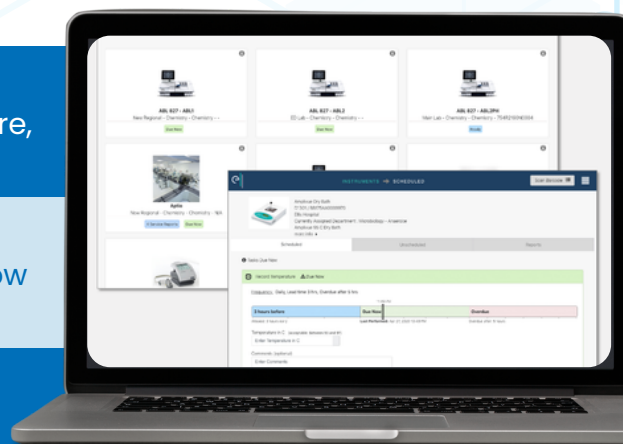

Real-Time Visibility Across Sites

Standardize workflows and improve operational oversight across laboratories, clinics, and POCT locations.

Secure Cloud-Based Access

Access records, dashboards, and compliance data remotely from anywhere.

Point of Care Testing

Simplify Point of Care Compliance
Across Every Location

Modernize Compliance. Improve Visibility. Eliminate Paperwork.

Managing point-of-care testing compliance across multiple facilities can quickly become overwhelming when relying on paper logs, spreadsheets, and manual tracking processes.

LabLogs provides a centralized digital platform that helps healthcare organizations standardize compliance workflows, monitor testing activity, and maintain audit-ready documentation across every POCT location.

Quality Control Tracking

Digitally document and manage QC activities across every point-of-care testing device and location.

Instrument Maintenance Tracking

Track preventive maintenance schedules, service history, downtime, and operational status in a single system.

Automated Notifications

Receive configurable alerts through email or SMS for overdue tasks, compliance concerns, and instrument events.

Audit-Ready Reporting

Generate reports instantly to support inspections, audits, and internal quality initiatives.

Environmental Monitoring

Track temperature and environmental conditions to help protect testing accuracy and sample integrity.

Secure Electronic Documentation

Maintain centralized records with audit trails, electronic signatures, and role-based access controls.

Built to Support Compliance Initiatives

LabLogs helps simplify workflows associated with:

- CAP
- CLIA
- Joint Commission
- Internal Quality Programs

The Result?

- Less paperwork
- Improved visibility
- Faster audit preparation
- Reduced admin workload
- Consistency across sites
- Increased staff efficiency

**Replace Manual Processes
with Digital Oversight**

Platform Overview

Digital Compliance Management for Modern Laboratories

Replace paper-based workflows with centralized digital oversight.

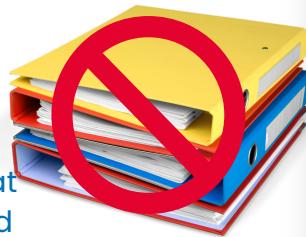

LabLogs is a laboratory compliance and workflow management platform designed to help healthcare organizations modernize documentation, automate recurring tasks, and improve operational visibility across laboratory environments.

From quality control and preventive maintenance to environmental monitoring and audit-ready reporting, LabLogs centralizes critical compliance activities in a single, easy-to-use digital platform.

The Problem with Paper-Based Compliance

Paper-based compliance processes increase risk, reduce efficiency, and complicate audits.

LabLogs replaces manual workflows with a centralized digital platform that improves visibility, accountability, and operational efficiency.

Many laboratories still rely on:

- Paper binders
- Manual spreadsheets
- Sticky notes
- Shared drives
- Inconsistent workflows
- Manual reminders

Core Platform Modules

- **Quality Control Tracking** – Monitor QC activities with customizable workflows.
- **Preventative Maintenance** – Manage recurring maintenance to reduce downtime.
- **Environmental Monitoring** – Track temperature and environmental conditions.
- **Lots & Reagents Tracking** – Maintain traceability from receipt to expiration.
- **Service Reports & Downtime** – Track instrument service history and downtime.
- **Reporting & Dashboards** – Generate real-time compliance and operational reports.

Operational Benefits

- **Reduce Administrative Work** – Automate recurring tasks and reminders.
- **Improve Audit Readiness** – Maintain searchable, audit-ready records.
- **Standardize Processes** – Create consistent workflows across all locations.
- **Improve Visibility** – Monitor compliance and instrument status in real time.
- **Reduce Downtime** – Proactively track maintenance and service activities.
