

Prior Authorization Expertise. Smarter Technology. Better Revenue Cycle Performance.

NYX Health helps healthcare organizations reduce the administrative burden behind prior authorization, patient access, and medical coding. Our experienced teams and AI-enabled solutions work within your existing workflows to increase capacity, improve efficiency, and help prevent avoidable delays and denials.

CORE SERVICES

Prior Authorization

Reduce delays, denials, and administrative burden with end-to-end prior authorization support. Our payer-experienced team manages medical procedure and specialty medication authorizations from benefit investigation and submission through follow-up, denials and appeals.

Insurance Verification & Scheduling

Improve patient access before care begins. NYX Health verifies coverage and benefits, identifies authorization requirements, and supports scheduling workflows to help reduce front-end delays and prevent avoidable reimbursement issues.

Medical Coding

Protect reimbursement with accurate, compliant coding. Experienced coding professionals provide scalable support to improve accuracy, maintain productivity, and keep revenue moving without adding internal headcount.

TECHNOLOGY SOLUTIONS

AI for Prior Authorization

Automate the repetitive work behind prior authorization. AI-enabled workflows streamline key authorization tasks, reduce manual touchpoints, and help teams manage growing volumes more consistently and efficiently.

AI Clinical Denial Appeals

Turn clinical denials into actionable appeals—faster. AI analyzes clinical documentation and denial information to support appeal development, organize evidence, and reduce the manual work required to pursue reimbursement.

Built to improve efficiency, capacity, and reimbursement.
